RMS ON BOARD

On Board IP video management solution "ALL IN ONE"

RMS On Board

Complete system with "On Board PC architecture", and our e-netcamCLIENT IP video management software included.

IProNet´s On Board recorder meets the video surveillance needs linked to moving vehicles with up to 4 cameras, ensuring at any time the system performance, reliability and cost efficiency.

Designed for the most demanding needs, its solid-state drive and the safe boot&shut down system for both the recorder and the cameras with the vehicle ignition, allows this solution to be at the forefront of the On Board IP video recorders.

The recordings are totally multistream, MJPEG, MPEG4 and H.264 both video and audio, with alarm management and system monitoring, making RMS On Board the best option in any IP video installation.

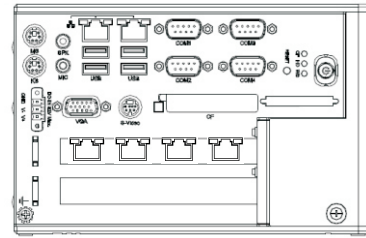

RMS On Board

LEADING IP VIDEO

IProNet

On Board IP vdeo management solution **"ALL IN ONE"**

RMS On Board

High performance and cost efficiency On Board IP video recording system.

Specifications

- Industrial device specially designed to be on vehicles
- Highly resistant to vibrations thanks to its solid-state drive and the absence of wires inside
- Powered by an intelligence device that detects the vehicle´s ignition to prevent battery discharges
- Integrated PoE switch to supply power to up to 4 cameras
- Recording download and remote system management via WiFi or optional 3G
- Resistance to a wide temperature range to be able to perform in the most demanding environments
- Small device easily located on the vehicle

Including all e-netcamCLIENT7 functionalities

- Live camera display
- Recording
- Recording playback
- Task planning
- Constant system monitoring
- Removable device recording
- Reception of alarms and camera, video encoders and Net-IMDC devices activation
- Among others...
