

**e-netcamANPR**

Automatic number plate recognition system

# Applications

**e-netcamANPR**

e-netcamANPR is an automatic number plate recognition and management system based on IP technology, developed by IProNet Sistemas, integrated into the "e-netcam" solutions range.

Specially indicated for those places where it is necessary to control human and vehicle access, economical, efficiently and integrated into the rest of the system's video solutions: Watch, Record, Warn and Act. All in just one system

LEADING IP VIDEO

## e-netcamANPR

The most reliable automatic number plates recognition and reading solution.

### Scalability. Integration

Scalable and integrable with IProNet's IP video technology and alarms systems. e-netcamANPR is a hardware and software plug and play solution (cameras not included).

### Features:

#### Number plate capture and analysis

- Digital image capture
- Simultaneous reading of several number plates
- Transmission in IP networks

#### Number plate list management

- Multiple lists of number plates (black, white, of pupils, teachers, cleaning, security staff, etc.)

#### Actuation protocol automation

### "Free flow" reading management

- Capture and reading in motion
- Available for moving vehicles (patrol cars)

### Occupation Management

- Number plate reading from multiple countries
- "Container" number plates
